🎯 Output: Only invoice address type contacts

📸 Screenshot: Filtered contacts list

GROUP BY (Explain Output)

Module	Group By	Output Explanation
Employees	Department	Shows employee count per department
Sales Orders	Salesperson	Shows how many orders each salesperson handled
Quotations	Salesperson	Shows quotation workload per salesperson
Contacts	Country	Shows customers grouped by country

📌 Group By ka matlab hota hai data ko category wise arrange karna.

□ Final Understanding

Action	Purpose
Filter	Sirf required records dikhana
Group By	Data ko summary format me dekhna
Archive	Record delete nahi hota, bas hidden hota hai
Related User	Employee ko system login dena
